A statement by Hon. Rome comes the announcement that Governor Taft has sent a "last note" to Cardinal Rampolla on the friar lands and a dispatch from Washinghe will leave Rome on the 24th inst., resuming his journey to Manila. This means that under instructions from Washington he has reiterated practically the first proposition of the United States. When he went to Rome it was his announced purpose to leave there on the 23d inst., so he is not hurrying his departure. His last note and his leaving Rome will probably convince the Vatican authorities that they cannot gain anything in the negotiations by quibbling or delay.

With a dozen or more days in July the conspirators to double the price of July corn seem to have lost their aim and have settled with their victims. Perhaps, they came to the conclusion that their dupes could not pay all that they might owe and concluded to take what they could get. There must be a very large number of sheared lambs, but they are not If they were no one would have any sympathy for them. It was simply a ease in which each man tried to get the other man's dollar for nothing. It is some satisfaction that the conspiracy to corner corn has partially failed, since if any commodity of general consumption could be cornered by capital it was July corn.

THE SANCTITY OF CONTRACTS. No stronger argument has been made against a general strike of coal miners than the statement by G. D. Wood, of Kentucky, in yesterday's Journal. Mr. Wood is a member of the national executive board of the United Mine Workers, and, of course, speaks in the interest of the craft. His statement was an earnest plea for the sacredness of contracts. This point has not received the attention in all quarters that its importance deserves, though is but fair to say that a great many miners, probably a majority of those who will attend the convention to-day, recognize Mr. Wood embodied in his statement

a letter which he had addressed to President Mitchell, calling attention to the resolutions adopted by the conference of coal operators and miners held in this city in February last. The resolutions were a strong declaration in favor of observing contracts. The February conference consisted of coal operators and miners from Indiana, Illinois, Ohio and Pennsylvania. The main point of discussion was a new scale of wages, but incidental to this Mr. Justi, representing the coal operators of LOUISVILLE-C. T. Deering, northwest corner | Illinois, offered a series of resolutions dep- form. In this State the platform was igrecating strikes, recommending trade agreements for specified periods of time, and declaring "that we recognize the sacredness and binding nature of contracts and agreements thus entered into and are pledged in honor to keep inviolate such lution declared that "such contracts or consider ourselves severally and collectively bound in honor to carry them out in good faith in letter and spirit." When they were first introduced the resolutions were sidetracked by being referred to the scale committee. That committee tabled them, and passed them, thus giving them a special indorsement. Mr. Wood makes the point, and it is clearly a good one, that these resolutions committed the miners of the States above named to the faithful a crime." He expressed the opinion that so gross a breach of faith by miners under will take this view, and it is difficult to see how any honest man can take a different one. Labor unions that enter into contracts should be all the more careful to observe them because they cannot be sued

> for violation of them. THE CIVIL SERVICE AS A CAREER.

The annual report of the chief examiner of the Civil-service Commission contains information regarding the chances of obtaining government positions under the civil-service law that should be interesting to those who contemplate making the effort. As a life employment or business career the government service does not offer great attractions to capable and ambitious young men, and yet it does offer some. A permanent position with a salary of from \$1,200 to \$1,800 a year, with occasional promotions to higher grades, and with light work, convenient hours, pleasant associations, and thirty days' vacation with pay each year is not a bad provision for a man of moderate desires. The drawbacks need not be enumerated, and if they were much more numerous than they are they would not stop the endless caravan of young men seeking government positions. A large majority of those who succeed in getting them would probably do much better in the long run by engaging in some private business.

The report referred to shows that the vacancy to which he can be appointed.

No clerical ability is required. Appointments in this branch of the service are apportioned according to the population of the several States and are made at the rate of 700 to 800 a year at an entrance salary of \$800 a year, with reasonable assurance of promotion according to good service. The report shows that during the last fiscal year 48,698 applicants for positions were examined. Of 21,028 for the departmental branch 15,779 passed and 5,249 failed; of 3,433 for the customs houses, 2,856 passed and 577 failed; of 449 for the internal revenue offices, 252 passed and 197 failed; of 1,709 for the force of the public printer, 1,554 passed and 155 failed, and of the 20,901 for appointment in the different classified postoffices,

12,749 passed and 8,152 failed. The Journal's advice to any capable and ambitious young man who thinks of entering in the government service would be first qualify himself thoroughly to pass the examination and then, instead of taking it, do something else.

MARCHING AWAY FROM BRYAN, The anti-Bryan managers are making rapid progress in this State and Illinois toward getting the party organization on a basis of hostility to the Kansas City platnored by the state convention, and all of the congressional district conventions are forgetting that the last national declaration of the party was made in Kansas City in 1900. Such progress has been made in the march toward the Eastern Democratic leaders in this State that the announcement that Mr. Bryan would make half a dozen speeches in Indiana would cause general dismay, while the coming of David B. Hill, the "very still Democrat." would fill their hearts with something of the ecstasy that the coming of Mr. Bryan did in 1896 and in 1900. But is the rank and file, the thousands who hailed Mr. Bryan as their leader two years ago, marching away from him into the camp of the Eastern leaders who have denounced Mr. Bryan?

> A monograph issued by the treasury bureau of statistics, entitled "Commercial Alaska in 1901," presents some interesting facts regarding the resources and development of the Territory. At present the principal industries are gold, fish and furs, of which Alaska produces \$15,000,000 worth a year. The Territory was purchased in 1865 for \$7,200,000. Since then the government has derived from it in actual revenue over \$9,000,000, and according to the best estimates the bureau of statistics can make it has sent to the United States since that time about \$150,000,000 worth of products. The transportation facilities of the Territory are being rapidly developed, and its agricultural and live stock possibilities are regarded as very promising. Altogether, Alaska is proving a fine investment.

The declared intention of Senator Jones, of Nevada, to retire from the Senate at the expiration of his present term, next March, is the more regrettable because he will probably be succeeded by a Democrat. The office will be virtually for sale, and it is said the successful bidder is likely to be Hon. Francis G. Newlands, for some years past Democratic representative from the State. It is a curious condition of affairs, by the way, that Nevada, with a population of 42,000, less by 3,500 than she had ten years ago, should have an equal representation in the Senate with the great State of New York and a representative in the House when the present ratio of representation is one member for 208,000 popula-

Special to the Indianapolis Journal. LOGANSPORT, Ind., July 16 .- Up to the present Judge John C. Nelson, of Logansport, has refused to state whether he will accept the nomination for Congress thrust upon him by the Democrats of the Eleventh district at Peru yesterday or not, but if | the night doctors tried to locate the coin he allowed his personal preferences in the matter to govern him it is very apparent that he would not. To-morrow the committee, consisting of representative Democrats from the various counties in the district, are to notify him officially of his nomination and receive his reply. In Judge Nelson the Democrats of the Eleventh district think they have found a man who can defeat Fred Landis and he is, in fact, the only man in the district they could find in whom they felt justified to impose this trust. That accounts for their persistency in placing him in nomination over his protest.
